www.linkedin.com/in/clarissaghavira

A fresh graduate in Information Systems from Gunadarma University with a strong enthusiasm for continuous learning and professional growth in technology. Possesses a keen interest in data engineering, data administration, and data analytics, particularly in transforming data into meaningful insights to support decision-making. Through academic projects and organizational experience, has developed solid skills in data processing, data visualization, and understanding information system workflows. Also experienced in teamwork, project coordination, leadership activities, and effective time management to consistently meet deadlines. Motivated to further enhance technical competencies and contribute effectively in a professional data-driven environment.

EXPERIENCES

Research oriented-Multivariate Weather Parameter Forecasting in Bogor District Using LSTM **Gunadarma University** **May 2025-September 2025**

- Processed and analyzed 17,000+ historical weather records (2017–2024) from Bogor Regency using Python.
- Performed feature engineering and applied data normalization techniques for multivariate time series modeling.
- Built and evaluated LSTM models to predict daily temperature, rainfall, humidity, and sunshine duration.
- Assessed model performance using MAE and RMSE, with 4 out of 5 variables meeting climatological accuracy thresholds.

Intern - Research Assistant **Otoritas Jasa Keuangan** **March 2025**

- Drafted UAT Scenario Document (Phase 1, Part 2) aligned with OJK's software testing framework.
- Successfully prepared UAT scenario documentation (Phase 1, Part 2) in alignment with OJK's software testing framework.
- Conducted benchmarking analysis of the SINTESIS LMS platform to compare features and gain user experience insights.
- Studied the Digital Competency Dictionary and performed a mini research on the relevance of 10 core digital competencies for regulators in 2025.
- Proposed updates to the digital competency list and developed a draft syllabus for potential training modules.

Capstone Project Data Analytics

RevoU Technology

February - June 2024

- Conducted EDA, data cleaning, and SQL querying using Spreadsheets and BigQuery on a European bicycle sales dataset.
- Identified a significant profit decline in 2016 based on six-year sales trend analysis.
- Developed data visualization dashboards in Google Looker Studio covering key metrics such as profit, units sold, unit price, country performance, segmentation, and category sales.
- Generated data-driven insights and recommendations to address sales decline and cost optimization.
- Collaborated in a team with defined roles (PIC) covering data cleaning, analysis, visualization, and communication.

Scientific Research Project Reduced Hotel Cancellation

Gunadarma University

March - August 2024

- Analyzed 119,000 hotel booking demand records and identified a high cancellation rate for City Hotels (65.5%), significantly higher than Resort Hotels (34.5%).
- Performed data cleaning in Google Colab, including fixing 488 missing values and handling outliers.
- Built interactive dashboards in Looker Studio to present cancellation trend insights from 2015–2017.
- Delivered data-driven operational recommendations to reduce cancellations through pricing optimization, customer segmentation, and lead time analysis.

SQL Development & Oracle Course

Gunadarma University

2021- 2024

- Explore basic and advanced database management concepts in SQL and Oracle.
- Intensive practice in writing SQL and Oracle queries on given case studies
- Working on weekly reports using SQL and Oracle queries based on given case studies.
- Develop an in depth understanding of application development with SQL and Oracle.

ORGANIZATIONAL EXPERIENCE

Volunteer Equipment Division

Gunadarma University BEM FIKTI

March 2023– Agustus 2023

- Assist in preparing all forms of equipment needed by the organization or during the event, ranging from stage equipment, other division equipment to equipment for participants or audiences who attend the event.
- Ensure all equipment is available both before the event starts until the end of the event.
- Produce effective event processes and equipment products with the needs of the organization and related external parties.

Leader Liason Officer

Representative of the alumni committee Srikandi (Traditional Art and Dance Union)

April 2020 – Mei 2021

- Responsible for communicating with external parties involved in the event to keep all parties informed of event details and meet set requirements.
- Responsible for the successful organization of the event and responding to external party inquiries or needs.

EDUCATION

Gunadarma University
3.85 out of 4.00

2021-2026

ACHIEVEMENT

- Received BUMN scholarship for two period.
- Received HTML 5 certification.
- Received an award as the best Volunteer in the BEM FIKTI Gunadarma event among all divisions.
- Got the best project in RevoU for Bikesales dataset.

EXPERTISE

- Languages : Indonesia (Native), Bahasa Inggris (Intermediate)
- Software : Microsot Office (Word , Excel , PowerPoint), Google Collab, Google Looker Studio
- Database : SQL Intermediate, Oracle
- Programming Language : Web (HTML Beginner, CSS), Phytion Beginner, Javascript Beginner
- Soft Skilss : Teamwork,Leadership,Adaptability,Communication,Management Time,Analytical Thinking
- Data Analytics : Businness Understanding.
- Data Cleaning : Google Collab,Spreadsheet,SQL Big Query.
- Data Visualization : Google Looker Studio, Data Communication.
